Chairman: FRIČ Roman

8.45−9.30
Di MAIO Giuseppe
Cofinal completeness of the Hausdorff metric topology (with *Gerald Beer*)

9.35−9.55
HOLÁ Ľubica
Functional characterizations of Čech-complete spaces and minimal usco maps

10.00−10.20
CHUDZIAK Jacek
Stability of the translation equation

... coffee ...

Chairman: Di MAIO Giuseppe

10.40−11.00
BOROS Zoltán
Weakly affine functions

11.05−11.25
GILÁNYI Attila
On subquadratic functions (with *Katarzyna Troczka-Pawelec*)

11.30−11.50
LAJKÓ Károly
Functional equations stemming from probability theory

11.55−12.15
KOSTYRKO Pavel
Cauchy functional equation and generalized continuity

MONDAY – SEPTEMBER 1, 2008

Chairman: LAJKÓ Károly

15.00−15.20
ZINDULKA Ondřej
Each $\mathcal{M}$-additive set is $\mathcal{E}$-additive: Fractal approach to small sets of reals

15.25−15.45
NOWIK Andrzej
Injective continuous images of Hamel bases

15.50−16.10
SZYSZKOWSKI Marcin
On the ω_1 limits of subsets of the real line $\mathbb{R}$ (with *Andrzej Nowik and Tomasz Weiss*)

... coffee ...

Chairman: KOSTYRKO Pavel

16.25−16.45
PAŠTÉKA Milan
Remarks on the mappings on integers and the asymptotic density

16.50−17.10
MALIČKÝ Peter
Interior cycles of the Lotka-Volterra map with prescribed itineraries

17.15−17.35
MARČOKOVÁ Mariana
On sums of some powers of orthogonal polynomial zeros (with *Branislav Ftorek*)

17.40−18.00
KOVÁČIK Ondrej
A new denotation for some objects

TUESDAY – SEPTEMBER 2, 2008

Chairman: WILCZYŃSKI Władysław

8.45−9.05
BARTOSZEWICZ Artur
On density with respect to equivalent measures - part II (with *Małgorzata Filipczak and Tadeusz Poreda*)

9.10−9.30
FILIPCZAK Małgorzata
On density-type topologies stronger than the density topology and generated by functions

9.35−9.55
TEREPETA Małgorzata
Measurability of functions with equal closures of graphs

10.00−10.20
WOJDOWSKI Wojciech
A further generalization of the density topology

... coffee ...

Chairman: FILIPCZAK Małgorzata

10.40−11.00
WAGNER-BOJAKOWSKA Elżbieta
Density topologies on the plane between ordinary and strong (with *Władysław Wilczynski*)

11.05−11.25
ZDUNCZYK Rafal
Local system approach to the I-density

11.30−11.50
DUSZYŃSKI Zbigniew
On properties of some weak forms of closure operator

11.55−12.15
JĘDRZEJEWSKI Jacek
On some properties of connected functions

Chairman: KWIECIŃSKA Grażyna

15.00−15.20
MATEJDES Milan
Decomposition of topological spaces and generalized continuities of mappings

15.25−15.45
SZCZAWIŃSKA Joanna
On same families of multifunctions

15.50−16.10
OLKO Jolanta
On properties of multimeasures

... coffee ...

Chairman: BARTOSZEWICZ Artur

16.25−16.45
KWIECIŃSKA Grażyna
On measurability of multifunctions strongly quasi-continuous in second variable

16.50−17.10
PISZCZEK Magdalena
On a twice differentiable cosine family of multifunctions

WEDNESDAY – SEPTEMBER 3, 2008

Chairman: HOLÁ Ľubica

8.45−9.30
SKVORTSOV Valentin
Harmonic analysis on zero-dimensional abelian groups

9.35−9.55
TULONE Francesco
Application of Kurzweil-Henstock type integral to some problems in harmonic analysis

10.00−10.20
RICCOBONO Giuseppa
An integral equivalent to the Bochner integral

... coffee ...

Chairman: SKVORTSOV Valentin

10.40−11.00
PLOTNIKOV Mikhail
Generalized integrals and De Bois-Reymond-type theorems for Haar series

11.05−11.25
RYCHLEWICZ Andrzej
On first-return integral

11.30−11.50
PAPČO Martin
Simplex structures and generalized probability

THURSDAY – SEPTEMBER 4, 2008

Chairman: BALCERZAK Marek

8.45−9.05
PAWLAK Ryszard J.
Invariant measures for DB_1-functions (with *Helena Pawlak*)

9.10−9.30
KOWALCZYK Stanisław
On the w-problem for some types of non-metrizable spaces (with *S. P. Ponomarev*)

9.35−9.55
LINDNER Sebastian
Characterizations of some subclasses of Baire one class (with *Monika Lindner*)

10.00−10.20
HORBACZEWSKA Grażyna
The set of discontinuity of density-type-approximately continuous functions

... coffee ...

Chairman: PAWLAK Ryszard J.

10.40−11.00
POREDA Wiesława
On sums of quasi-continuous functions with closed graphs (with *Tadeusz Poreda*)

11.05−11.25
HOLÝ Dušan
Pointwise convergence of real-valued quasicontinuous functions, equi-
quasicontinuity and Baire (with *Ľubica Holá*)

11.30−11.50
BORSÍK Ján
On bilateral cliquishness

THURSDAY – SEPTEMBER 4, 2008

Chairman: WAGNER-BOJAKOWSKA Elżbieta

15.00−15.20
PRUS-WIŚNIOWSKI Franciszek
A characterization of the Wiener class $\mathcal{W}_p^*$

15.25−15.45
ELIAŠ Peter
Relations preserving the convergence of series in topological groups

... coffee ...

Chairman: KOWALCZYK Stanisław

16.25−16.45
MIKUCKA Aneta
On the bounded graph derivatives of real functions (with *Robert Drozdowski*)

16.50−17.10
NOWAKOWSKA Katarzyna
On family of $[\lambda, \varrho]$-continuous functions

17.15−17.35
DUCHOŇ Miloslav
A Helly theorem in Banach spaces
(*presented by Peter MALIČKÝ*)

FRIDAY – SEPTEMBER 5, 2008

Chairman: MYJAK Józef

8.45−9.30
BALCERZAK Marek
On equi-Birkhof-integrability of sequences of vector-valued functions

9.35−9.55
WACHOWICZ Artur
Multiplying balls in $C^n[0,1]$

10.00−10.20
KUPKA Ivan
Generalizing calculus

... coffee ...

Chairman: JĘDRZEJEWSKI Jacek

10.40−11.00
MYJAK Józef
Some estimates of dimension of measure

11.05−11.25
HUTNÍK Ondrej
Wavelet subspaces and Toeplitz operators
